AboutFace21 offers
experience, highest quality care
and products and continuity of
care. Probably of more
importance is that your
Practitioner is local, friendly
and accessible. You will have
direct contact with your
Practitioner and are
encouraged to ask any
questions both before or after
any procedure.

Botox™ (Dysport™) therapy

Everytime we laugh, smile or frown, we set off a series of contractions in the facial muscles that, over time, create skin creases which can make us look anxious, worried and aged.

The treatment is quick and simple and, over a period of 3 to 5 days, the results become clear, softening and often eliminating those tiresome lines leaving you appearing refreshed, revitalised and youthful.

Side effects of the treatment are rare and usually mild. Your Practitioner will conduct a comprehensive assessment including a medical questionnaire and provide you with a clear after care advice sheet.

You should not undergo treatment if you are pregnant or breast feeding.

PRICE LIST:

Relaxing lines (Dysport™) - usually used in the upper third of the face to smooth out frown lines, forehead lines and crows feet

1 area £150

2 areas £200

3 areas £250

Smoothing lines and folds (dermal Fillers) £250—300 per syringe (half syringes available for smaller areas @ £185 per syringe)

Lip enhancement and definition £300 per syringe

Dermal Fillers

If you are looking to enhance your looks with a completely natural substance which achieves visible long lasting aesthetic results, this treatment is for you.

Hyaluronic acid is a substance that occurs naturally in our body. It is a crystal clear gel which constantly attracts water to it promoting skin hydration and boosting skin volume.

A simple injection replenishes lost volume and youthful contour, enhancing your facial profile, creating fuller lips and smoothing out lines and wrinkles.

Hyaluronic acid adds volume without affecting your natural expression. It is non permanent and absorbed naturally over time. AboutFace21 **do not use or recommend** the use of permanent dermal fillers.

In under an hour, you can have your treatment. There is no need for skin testing as these products have no immunological properties. The results are seen instantly and last typically for 6 months to over a year.
